

WESTEND RADIATORS

WE COME TO YOUR JOB SITE

On-Site Heavy-Duty Heat
Exchanger Repairs in 1-3 Days

AN OVERVIEW OF OUR MOBILE SERVICE

Our safety-certified mobile shop technicians can **travel across Manitoba, Saskatchewan and Alberta** to assess and repair your heavy-duty heat exchanger.

We will assess your heat exchanger, travel back to one of our locations to do the necessary work. Then, **return for reinstall.**

WHAT TO EXPECT WITH OUR MOBILE REPAIR SERVICE

1 Initial Site Visit/Quote

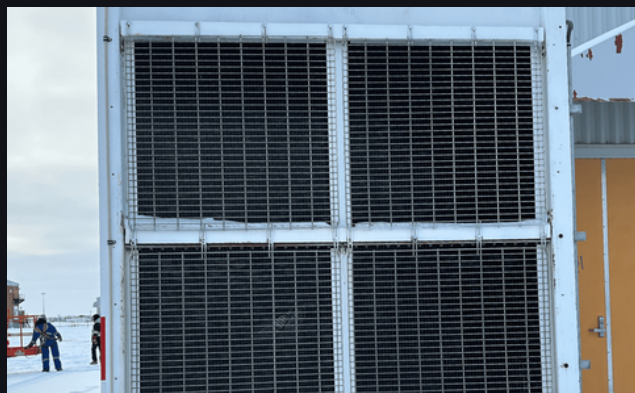

The West End Rad mobile service team will examine your generator and provide you with an estimate.

2 Service & Manufacturing

We will either manufacture the new core at our Winnipeg manufacturing plants or return to remove your existing core and bring it to our shop for servicing.

3 On-Site Install

Once on-site for the install and repairs, we can have your generator's cooling system backup and running in as little as 1-3 business days.

OUR TEAM IS SAFETY-CERTIFIED

Our shop technicians are **safety-certified with ComplyWorks, ISN and Ledcor**, meaning you don't have to worry about slow contractor onboarding. As registered contractors, **we're able to get to work right away**, providing expert heat exchanger repairs without the wait.

CUSTOMER FEEDBACK TESTIMONIAL

What our customers have to say about working with us.

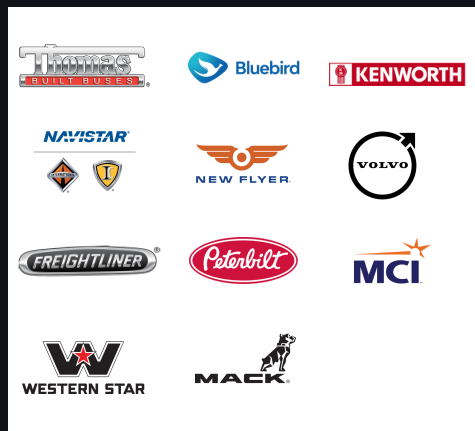

"I would highly recommend West End Radiators. We have been using West End Rad on our mine site for many years now and they have always been able to deliver top notch service and quality products on time and go over and above to deliver based on our tight schedules. We have used the West End Rad team to supply everything from simple hosing for our surface equipment, to same day rush rebuilds and repairs of critical equipment such as rads and fuel cells for our large underground equipment. The West End Rad team are always professional, deliver on schedule, and work with us to quickly determine the best solution for our current needs."

— Rob Corden, Mine Maintenance Supervisor
